Online Rate Sheet: (include screenshot)

## Rates

Single-family residential rates are based on the amount of impervious surface (roof, patio, driveway, etc.) on the property. There are two tiers: properties with less than or equal to 3000 square feet of impervious surface, and properties with greater than 3000 square feet of impervious surface.

### Current Rates

Amount of Impervious Surface	Rate
Less than or equal to 3000 square feet of impervious surface	\$3.75 per month
Greater than 3000 square feet of impervious surface	\$5.25/ per month
For non-single-family residential properties (multi-family, commercial, industrial, government, and churches)	Assessed per 3000 square feet of impervious surface
Every 3000 square feet of impervious surface	\$3.75 per month

## Credits

Non-single-family residential property owners can apply for credits to reduce the amount of their bill. These credits are based on the Georgia Stormwater Management Manual. For a listing and description of the credits and application forms, please see the [City of Cartersville Stormwater Utility Service Charge Credit Technical Manual \(PDF\)](#). Credits will not be automatic. You will have to apply.

The credits are for activities that improve water quality or reduce the cost to the City by providing stormwater detention, flood control, and erosion control.

Type of Credit	Percentage
Green Space / Water Quality Credit	15%
Channel Protection Credit	15%
Overbank Flood Protection Credit	15%
Extreme Flood Protection Credit	15%

There is also a 50% credit for educational institutions that include water quality education in their curriculum. This is only available to schools that teach grades 1 through 12.
